

Aged Care Product Range

One Source

End-to-end Aged Care Supply Solutions

1

Scope Project

We begin each project with a detailed scoping phase which anchors the project priorities, helping us to define the desired outcomes.

We learn about the projects needs and motivations of stakeholders, establish the project boundaries and objectives, and begin to map the opportunities. Critically, we don't lock clients down to specifications and fixed ideas; we keep the options open.

- Industries insights and impacts
- Define project vision and objective
- Identify requirements

2

Rollout

Our highly skilled team of professionals provide a consultative service to project planners, architects, as well as construction contractors.

We also maintain a fully integrated Service and Maintenance Department that is well established ensuring all projects are delivered and installed to the highest degree of satisfaction for all stakeholders.

- Site visits
- Planned logistics
- Dedicated Axis Health installation and commissioning team
- Dedicated Axis Health in-service and training team

3

Offer Solutions

Global manufacturers from USA, Germany, Netherlands, and the UK, help us to produce and source our high-quality aged care equipment internationally. Additionally, one of our divisions is a Melbourne based high quality manufacturer, who completes our product offering by manufacturing unique stainless steel products, including shower chairs, instrument and equipment trolleys, various medical equipment and more.

With the help of our extensive range of aged care equipment and supply solutions, we proudly contribute to the planning of major aged care projects:

- Beds and Mattresses
- Furniture
- Materials Handling
- 60 40 Materials Management System
- Patient Handling
- Seating & Mobility
- Shower Chairs - Mobile
- Utility Carts
- Wire Shelving Systems
- We include the customer in the testing process

4

Demonstrate Trial Equipment

The crucial point is that trialling gives procurer's confidence. Confidence in their purchase and confidence in their concept. We want you to see how your product will work before buying.

- We will demonstrate the start to finish process
- The confidence to navigate all products
- Ability to work to, and maintain products
- We include the customer in the testing process

5

Review

Axis Health prides itself on maintaining satisfied clients — the job is never complete until all stakeholders requirements have been met and exceeded. We see ourselves as partners in your business — your success and satisfaction is vital to us.

Reviewing our services from initial scoping of the project to the last product installed is something we take pride in.

- Review team
- Key stakeholder analysis
- Feedback
- Ongoing contact for service and future equipment requirements

Axis Health offers a comprehensive range of products comprised of industry trusted and renowned brands.

Our direct to market policy ensures experienced and reliable sales representation to our customers, provides comprehensive internal customer support, together with after sales service back up.

Stralus Beds

The Stralus bed range combines contemporary style with advanced Australian engineering and design. The range offers two models; S Line and S Line Low, each offering extremely low heights to provide safety and comfort for the resident.

The unique design of the S Line Low Bed mechanism allows it to achieve its market-leading low height and ease of use. Each bed is available with a range of accessories to further improve the user experience, and can be optioned in a range of colours and styles to integrate seamlessly with the surrounding furnishings.

S Line Bed

- Low height 195mm to mattress base
- Height range 195–700mm
- 4 section top includes back rest and knee break
- Fully electric with hand pendant control
- Attractive head and foot board and side trims
- Option of trim colours and finishes to coordinate with decor

Optional Accessories: Patient bed stick; Self help pole; IV pole; Battery backup; 200mm bed extension; wall bumper bar; 125mm castors (100mm standard)

Size Options: Standard Single; King Single

S Line Low Bed

- Extreme low height 135mm to mattress base
- Height range 135–700mm
- 4 section top includes back rest and knee break
- Fully electric with hand pendant control
- Attractive head and foot board and side trims
- Option of trim colours and finishes to coordinate with decor

Optional Accessories: Patient bed stick; Self help pole; IV pole; Battery backup; 200mm bed extension

Size Options: Standard Single; King Single

Pressure Care Mattresses

PC150 3-Core Mattress

The 3-Core Mattress offers a high level of pressure care suitable for a wide range of current hospital and nursing home beds. This mattress is often recommended by therapists for residents requiring extended bed stay periods (pressure care).

Features a one piece waterproof cover for superior infection control. The mattress cover is 2-way stretch carrflex with optional mediflex base. Mattress size can be custom built to suit your needs including king single and larger bed sizes.

Recommended for medium to high pressure care management

PA 5550M / 74M Elite II Replacement System

The Elite Mattress Replacement System provides a cost effective solution for both the prevention and treatment of pressure ulcers, suitable for patients up to Very High Risk of developing pressure ulcers.

Easy to install and operate, the Elite is suitable for both hospital and homecare environments. With an underlayer of fully encased visco-elastic foam for added support, the Elite mattress combines alternating therapy with optimum user comfort.

PA 550M Eclipse Mattress Overlay System

The Elite Mattress Replacement System provides a cost effective solution for both the prevention and treatment of pressure ulcers, suitable for patients up to Very High Risk of developing pressure ulcers.

Easy to install and operate, the Elite is suitable for both hospital and homecare environments. With an underlayer of fully encased visco-elastic foam for added support, the Elite mattress combines alternating therapy with optimum user comfort.

Recommended for patients at very high risk of developing pressure ulcers
