BLANKET & FLUID WARMERS

Our range of Blanket & Fluid Warming cabinets are designed to maintain blankets and fluids at a safe temperature to assist patient comfort in maternity, theatre, aged care etc. The fan forced system allows even temperature throughout the cabinet. The LED digital display allows you to see the temperature easily. Fitted with a built in HI alarm in case of overheating. Designed and built in Australia finished with stainless interiors/exterior and chrome plated shelves

Standard Features on all models

- Double glazed doors
- Magnetic door closure
- Free standing / Bench / Wall mounted options available
- Radial hot air fan
- Micro-processor control
- LED Temperature control
- Temperature lock out
- Adjustable chrome plated shelving
- Stainless steel construction

The range illustrated offers applications for Blanket Warmers and Fluid Warmers. Please see guide below for the availability of each range
